

CHAIN OPERATED BLINDS

1. CONTROL

DESCRIPTION OF THE CONTROL USING THE CHAIN:

The blind is lifted and lowered using the chain. The chain is manipulated in the area of the wing frame and in parallel to the lamellas. Drawing is always by one chain in a downward direction. When drawing the chain with both pieces, the blind body can be extracted from the holder or, for example, loosening of the side board from the wing frame. The tilting of lamellas and regulation of light is performed by fine manipulation with the chain. The lifting height of the lamellas is secured by catching the chain in the holder. For versions of the blind fitted with a brake, the lifted lamellas are held in any position without the need to secure the chain in the holder. The control of the bevelled and broken blind: Lifting the blind by means of the control chain is possible only up to the broken part of the blind.

After setting the blind into the requested position, fix both parameters of the chain into the chain holder!

Description of the control using the electric engine:

The blind can be lifted or lowered by the electric drive, using the remote control or the switch. To set the electric control of the blinds, follow the manual for this device that was delivered by the supplier.

2. MAINTENANCE

The product does not require any extraordinary maintenance or lubrication of control mechanisms.

In the case of dirtying (dust), regularly use a fine brush or a slightly adjusted manual vacuum cleaner.
vacuum cleaner.

During common cleaning regularly wipe the surface with a cloth or a wet soft textile or sponge. Only use soap solutions without chemical ingredients at a temperature of up to 30°C.

Do not use aggressive detergents, such as organic solvents, cleaning sand and cleaning pastes which develop vapours and strong alkali cleaning detergents.

NOTIFICATION:

Ensure careful cleaning of shading lamellas to prevent jamming or other damage.

When cleaning windows, set the product into a position to prevent damage and any interference while cleaning.

Protect the product against dirtying during reconstruction and painting.

Note: NEOISOLITE blinds can be easily dismantled from the window wing for cleaning and for easy cleaning of the window.

3. SAFETY INSTRUCTIONS

Important note

Pursuant to the EN 13 120 standard, we hereby call your attention to possible hazards posed by the use of pull cords and chains!

Safety instructions / strangulation hazard:

- Young children have been strangled by loops in pull-cords, chains and tapes, and cords that operate the product.
- To avoid strangulation and entanglement, keep cords out of the reach of young children. Cords may become wrapped around a child's neck.
- Move beds, cots and furniture away from window covering cords.
Install the enclosed safety components to make sure cords do not twist and create a loop.
- Do not use force when handling the product if any obstacle prevents its motion.
- Do not attach any items to the product (particularly on the lamellas, control cords, nylon and draw bars).
- Prevent mechanical stress and damage to the product.
- For products controlled by cords, keep cords out of the reach of children to prevent entangling and jamming.
- Handle the product carefully, especially during cleaning.

FOR PRODUCTS WITH MOTOR-DRIVEN DRIVES:

- To set the electric control of the product, follow the manual for this device that was delivered by the supplier.
- Do not allow children to play with the equipment. Keep the remote control out of the reach of children.
- Check the installation for damage to inlets.
- For the inspection or maintenance of electrical parts, the product must be disconnected in an appropriate manner from the electricity supply.

NOTIFICATION:

Electric installation, assembly and maintenance must only be performed by fully-qualified persons who are authorized and capable for the stated actions.

In the case of a defect or mechanical damage to the product, prevent any further use.

NOTES:

- If the product is not functional, contact the seller or the firm which assembled the product.
- The display of the product may slightly differ from the actual version. The producer reserves the right to make changes.

- After the termination of the service life, do not dispose of in communal waste. Materials used can be separated and handed over in accordance with the valid regulations on waste and environmental protection. Information on waste collection points can be obtained from the local administration office.
